

PORTLAND POTTERY & METALSMITHING STUDIO

Glaze Calculation w/ Cathy Hammond

Workshop January 28th • 1-5pm

Review of Glaze Results February 6th • 6-8pm

Tuition: \$75 • Students: \$60

Color It Mine... Are you tired of relying on commercially prepared glazes? Are you ready to move beyond mixing glazes from other peoples recipes? Would you like to have *your own unique glaze palette*? Then this class is for you!

This class will touch briefly on the basics of glaze formulation, but will focus more time on color development and glaze blending techniques. Many color possi-

bilities can be achieved with commonly known minerals, carbonates, and oxides. More still can be achieved with commercially prepared stains. But when you start blending glazes and glaze colors, the possibilities are endless!

Bring your own dry base glaze for experimentation, or use one of ours. When registering specify your preference, and temperature range (c/04 ox.; c/5-6 ox.; c/9-10 reduction).

Also bring: gram scale (if you have one), small box of zip-lock sandwich bags, permanent marker, notebook, pencil/pen, & calculator.

Sign Up Today, Space is Limited.
